1) Purpose

The purpose of this Injury and Illness Prevention Program (IIPP) is to establish minimum requirements for hazard recognition, evaluation, and control, to prevent workplace injury and illness.

2) Scope

This IIPP applies to all STACK Infrastructure California-based employees performing work at all California data centers, construction projects, and corporate office (SFO).

- i. SVY01A, 2001 Fortune Dr, San Jose, Ca 95131
- ii. SVY01B, 2001 Fortune Dr, San Jose, Ca 95131
- iii. SFO, 255 California St, San Francisco, CA 94111
- iv. Construction Projects

3) Key Responsibilities

- a) Matt Waymire, the Director of Critical Operations in the SVY market, is the IIPP Administrator for STACK Infrastructure and is responsible for:
 - i) implementing this IIPP procedure;
 - ii) overseeing workplace inspections and corrective action plans;
 - iii) overseeing procedures for incident management to ensure prevention of re-occurrence;
 - iv) coordinating with the VP of Environment, Health and Safety (EHS) and communicating when changes occur at the site which impact the EHS risks to employees.
- b) Vice President of Environment, Health and Safety is responsible for:
 - i) providing technical support and guidance for the IIPP Administrator;
 - ii) ensuring adequate resources are available to support the EHS needs of the site;
 - iii) ensuring STACK's EHS procedures are maintained and properly implemented.
 - iv) developing and implementing health and safety procedures that ensure safety and compliance;
 - v) identifying safety training needs, and developing and overseeing systems for providing training and maintenance of personnel training records;
 - vi) tracking relevant safety and health regulatory developments that impact STACK Infrastructure;
 - vii) evaluating overall risk at STACK Infrastructure locations and developing a strategic health and safety plan; and
 - viii) assisting managers and supervisors in implementing this IIPP as necessary.
- c) Managers and supervisors are responsible for:
 - i) ensuring all of STACK Infrastructure's written safety procedures, including this IIPP, are clearly communicated and understood by all personnel;
 - ii) ensuring compliance with all of STACK Infrastructure's safety policies and procedures;
 - iii) managing preventative maintenance and periodic inspection requirements for health and safety equipment, such as electrical systems, heating, ventilation, fire systems, etc.;
 - iv) ensuring periodic workplace inspections are completed in accordance with requirements and that any

- corrective actions are completed and documented;
 - v) ensuring a Job Safety Analysis (JSA) is completed in accordance with STACK Infrastructure's Job Safety Analysis Procedure for all new hazards that are identified, introduced, or installed in their work area, including for any new equipment, tools, chemicals, and operations;
 - vi) informing personnel of any hazards related to their job tasks, work environment, or materials used;
 - vii) assisting with incident reporting and investigations;
 - viii) identifying when there have been substantial working condition changes, e.g. new equipment or processes, that change the EHS risks and exposures present in the workplace which require new controls; and
 - ix) instructing personnel on location-specific safety procedures and plans.
- d) All personnel, including STACK Infrastructure employees, contractors, subcontractors, and vendors are responsible for following all STACK Infrastructure written safety procedures, including this IIPP. All personnel are responsible for:
- i) completing all required safety training, including vendor on-boarding and site-specific safety orientation;
 - ii) immediately reporting all incidents and safety concerns to their manager, supervisor, or the Director of Technical Maintenance Operations;
 - iii) participating in workplace inspections, incident investigations, and other safety programs as needed.

4) Detailed Process and Policy

a) Compliance

All STACK Infrastructure employees are responsible for complying with safety policies and procedures intended to provide a safe and healthful workplace. STACK is committed to continuous process improvement and strive to meet compliance obligations by:

- i) informing personnel of the provisions of STACK Infrastructure's IIPP;
- ii) evaluating the safety performance of all personnel;
- iii) conducting periodic in-house and 3rd party audits and assessments;
- iv) recognizing employees who perform safe and healthful work practices through Paycor or by awarding Assembly points;
- v) providing retraining to any employee who demonstrates a lack of competency or knowledge of safety requirements and maintaining that data in our Learning Management System (LMS); and
- vi) disciplining workers for failure to comply with safe and healthful work practices through Paycor and initiation of a performance improvement plan.

b) Communication

STACK Infrastructure is committed to facilitating open communication between upper management, supervisors, and employees to ensure safety and health information is readily understandable to and between all personnel. Personnel will not be retaliated against for reporting hazards, potential hazards, or safety-related suggestions. This is accomplished by:

- i) new employee orientation, which includes location-specific safety and health policies and procedures;

- ii) recurring monthly team meetings and/or Safety Champion meetings;
 - iii) safety trainings;
 - iv) safety committee meetings;
 - v) toolbox talks;
 - vi) a system for workers to anonymously inform management about workplace hazards without fear of reprisal;
 - (1) Anonymous Online Form: <http://stackinfra.ethicspoint.com/>
 - (2) Third Party Hotline: 844-956-3268
 - (3) Reporting to General Counsel, VP of EHS, or Human Resources
 - (4) Reporting to the CEO
 - vii) a culture that affords every employee with the authority to STOP WORK if a situation is deemed hazardous or there is concern for their personal safety or the safety of another;
 - viii) email communications; and
 - ix) postings in the office.
- c) Hazard Assessment
- i) Inspections of STACK Infrastructure facilities to identify and evaluate workplace hazards will be documented and performed:
 - (1) at least quarterly;
 - (2) when new substances, processes, procedures, or equipment are introduced into the workplace that may present potential hazards;
 - (3) when new or previously unidentified hazards are recognized;
 - (4) when any employee is assigned to a task with a hazard that has not been previously evaluated; and
 - (5) whenever conditions exist that are thought to warrant an inspection.
 - ii) A copy of the site PPE Assessment is saved in SharePoint.
 - iii) A copy of the Violence in the Workplace risk assessment is saved in SharePoint
- d) Incident Reporting & Investigations
- i) All workplace incidents, including injuries, illnesses, and near-miss incidents, will be recorded, investigated, and reported as detailed in STACK Infrastructure's Incident Management Procedure.
- e) Hazard Correction
- All unsafe or unhealthful work conditions, practices, or procedures at STACK Infrastructure will be addressed in a timely manner based on the severity of the hazards and according to the following:
- i) if a problem is minor and it is safe to do so, the person who discovered it should correct the hazard immediately when observed or discovered;
 - ii) if the hazard cannot be immediately corrected without endangering personnel or property, it should be barricaded or otherwise isolated, so others are made aware of the hazard and reported to a manager or supervisor immediately;

- iii) the hierarchy of controls should be utilized to resolve hazards; and
- iv) all corrective actions will be documented on either the Incident Report and Investigation Form, within SOSPEs, or through NetSuite by attaching documentation to the case.

5) Training

- a) All personnel will receive training and instruction on the requirements of this IIPP in addition to general and job-specific safety procedures.
- b) Training on this IIPP will be provided at the beginning of employment with STACK or following relocation to a California-based workplace.
- c) General and job-specific safety training will be provided:
 - i) at the beginning of employment or when personnel are given new job assignments for which training has not already been provided;
 - ii) as required by STACK Infrastructure's written safety procedures or local regulations and when an employee demonstrates a lack of competency or knowledge of safety procedures;
 - iii) whenever new substances, processes, procedures, or equipment that may present a new hazard are introduced to the workplace;
 - iv) whenever STACK Infrastructure becomes aware of a new or previously unrecognized hazard; and
- d) Training will be assigned through STACK's LMS.
- e) Training topics are defined within the STACK training procedure and associated training matrix.

6) Records and Documentation

- a) Employees have access to this IIPP through SharePoint in the Site Playbook or by contacting the IIPP Administrator or the VP of EHS.
- b) Safety Committee meeting minutes are available to all employees by requesting a copy for a Committee Member or accessing on SharePoint.
- c) Incident Reports, Investigation Forms, Near-Miss Forms, JSAs, and other hazard inspection documentation will be retained for at least two years on SharePoint.
- d) Training records for all employees, including the contents of the training, the name of the instructor, the date of the training, and the name of the employee(s) trained, for the length of the individual's employment will be maintained in STACK's LMS.

- c) STACK Infrastructure's Safety Committee Procedure
- d) Title 8 California Code of Regulations Section 3203 Injury and Illness Prevention Program

8) Definitions

- a) Administrative Controls: changes to work procedures, such as written safety rules, schedules, and training, used to reduce the duration, frequency, or severity of hazards posed by a job or task.
- b) Engineering Controls: a physical change to a system or process used to eliminate or reduce the hazard posed by a job or task.

- c) Hierarchy of Controls: a system used to minimize or eliminate exposure to hazards starting with the most effective hazard controls. From most to least effective, the hierarchy requires the use of elimination, substitution, engineering controls, administrative controls, and then PPE to control for the hazard.
- d) Incident: an undesired, work-related event that results in injury, illness, or property damage.
- e) Job Safety Analysis (JSA): a step-by-step process for identifying and controlling risks in the workplace or for a work activity or process.
- f) Near-Miss: a work-related event in which no personal injury or illness was sustained, and no property was damaged, but given a slight shift in time or position, damage and/or injury or illness could have occurred.
- g) Personal Protective Equipment (PPE): equipment worn to minimize exposure to hazards.

Section 02	Document Approval	
Peer Review:	Reviewers Name: Matt Goetz	Date:3/8/2024
Management Approval:	Approvers Name: Donna Lynch	Date: 3/6/2024

		Document Control	
Version	Section	Change	Date
V2	4.e.iv., 4.c.iii, 4.a.iii	Updated site names, added documentation about Violence in the Workplace Risk Assessment, Updated the awards process to Assembly points. Clarified and added information on SOSPEs. Added mention of audit program to support compliance. Clarified training responsibilities, including vendor on-boarding.	3/21/2024
