Rule 908 : Confined Space Rescue Procedures

1. Should a Teammate be overcome by a lack of oxygen or other circumstance that renders them unable to affect a self-rescue, fellow Teammates must not enter the space to attempt a rescue.
2. From the entry position the forced air ventilation hose should be moved as close to the unconscious Teammate's face as possible
3. Teammates should call 911 immediately.
 - a. In areas where 911 services are not available the Safety Coordinator shall publish a list of all appropriate rescue services and make such list available to the Entry Supervisor prior to beginning work.
 - b. Such list shall also be made available to the Supervisor, if different from the Entry Supervisor, and anyone else deemed essential to the entry/rescue process.
4. A designated Teammate shall stand by the space entry to keep other Teammates out of the space and to direct emergency rescue personnel to the rescue location.
5. Rescuers must be trained in and follow established emergency procedures and use appropriate equipment and techniques (lifelines, respiratory protection, attendants, etc.).
6. In the event a rescue needs to be made on non-permit required confined spaces, rescue services must be either: (PWC Department of Fire & Rescue Station 22 is certified to perform confined space rescue procedure. [7500 Century Park Dr., Manassas, VA 20109 – T:703-792-5022](https://www.teamfishel.com))
 - a. Provided by the host facility, or
 - b. Provided by an outside service which is given an opportunity to examine the entry site, practice rescue, and decline as appropriate. Or
 - c. Provided by the employer by selecting a rescue team that is equipped and trained to perform the needed rescue services.
7. If reliance is on the host facility, it must be stated in the contract and or documented prior to the Start of work. Teammates who are trained to perform rescues must practice these rescues annually.
8. If an injury occurs such as a cut or a sprain to the entry teammate that does not involve a hazardous atmosphere condition, the attendant may assist the entry teammate in getting out of the space but shall not enter themselves. Additional teammates may enter if properly trained.
