Ergonomic Measurement Guide

To complete this process, you will need a helper and a measuring tape. You may be asked for additional measurements throughout the assessment process.

Measurements

- Sit upright on a firm surface with your hips and knees level for all measurements.
- Wear the shoes you typically wear in your work setting during all measurements.
- Using the illustrations and descriptions below obtain your measurements, A through M.

Please see the descriptions below to match the labels in the pictures.

A	Popliteal: From the rear of your buttock to behind the knees when sitting upright (provides seat depth measurement).	H	Eye Height when Standing. Measure from the floor to the corner of the eye.
B	Standing Knee Height from the floor to the top of your knee when standing.	I	Seated Hip to Hip Measurement: Measure from the outside of left hip across lap to the outside of right hip when seated. Try not to bend the measuring tape.
C	Seated Knee Height: from the bottom of your heel to the bend under your knee (provides chair height)	J	Shoulder to Shoulder when seated. Measure from the outer edge of one shoulder to the other.
D	Elbow Height when Seated. Measure from the seat pan to under your elbow with your elbow bent & shoulders relaxed.	K	From the seat to the top of the shoulders (provides backrest height measurement).
E	Elbow Height when Standing. Measure from the floor to under your elbow with your elbow bent & shoulders relaxed as if your hands are on an imaginary keyboard). Be sure to keep your upper body “loose” and your shoulders relaxed.	L	Lumbar: From the top of the seat to the arch in your low back (provides lumbar support measurement).
F	Elbow to Elbow Width. Measure across the front of your body from elbow to elbow with your elbows bent next to your body.	M	Fingertip Height Seated. Measure from the floor to your fingertip level (as if your hands are on an imaginary keyboard). Be sure to keep your upper body “loose” and your shoulders relaxed.
G	Eye Height when Seated. Measure from the floor to the corner of the eye.	N	Desktop Height. The distance between the floor and the top of your worksurface
